

We make keeping the lights on work.*

* We don't often stop to appreciate how important power is to the functioning of our homes. Electricity keeps our food cold, our water hot, our devices charged and our lives moving. Whether it's the simple necessities or modern luxuries, Eaton is always working hard to make sure your power does, too.

Smart homes

Experts predict the world will have 31 billion connected devices by 2020. That's why, with Eaton products, you're outfitting your home for today and tomorrow.

Safe homes

Each year, in the UK alone, about 350,000 people are seriously injured due to electrical accidents in the home. So in addition to making sure your power runs reliably and efficiently, Eaton products are designed to make sure power flows safely.

Efficient homes

For the last 10 years, worldwide energy costs have been on the rise. With the right technology, any home can be more energy efficient. Our innovative, energy-saving solutions can help homeowners across the globe live more economically while reducing environmental impact in the process.

AF/GF CIRCUIT INTERRUPTER
The AF/GF circuit interrupter is a dual-function, Eaton-exclusive technology that protects against both arc and ground faults.

LOAD CENTERS AND CIRCUIT BREAKERS
Our innovative technology is code compliant and connects, protects and efficiently manages household electrical loads.

ANYPLACE SWITCH
Quickly and easily mount our Anyplace Switch on any flat surface in your home for convenient lighting control without the hazard of running wire.

OCCUPANCY AND VACANCY SENSORS
Increase convenience and energy efficiency by up to 80% with motion-sensitive lights that automatically turn on and off.

HOME AUTOMATION HUB
With a single app, our home automation hub serves as a powerful gateway to your connected home. Everything from thermostat control to garage door openers is just a touch away.

EATON HOME SKILL
Enable voice control of all your smart home devices – lighting, locks, thermostats and more – by adding the Eaton home skill to your Amazon Echo.

ENERGY MONITORING SYSTEMS
Our ecological and cost efficient energy monitoring systems give homeowners access to real time data on their home's energy generation, fault conditions and relative performance.

SMART LIGHTING
Every smart home needs smart lighting. Our Halo Home lighting system allows homeowners to wirelessly configure and control their lighting on their smart phone, from anywhere in the world.

OUTDOOR MOTION SENSORS
For convenience and security, our Bluetooth® enabled outdoor motion sensors let you adjust the sensitivity, duration and power-saving modes of outdoor fixtures, from your mobile device.

We make what matters work.*

* Whether you live in a single family home or high-rise condo, power is a fundamental part of keeping your home running. And we're here to make sure it works – safely, reliably and efficiently. To learn more, visit Eaton.com/whatmatters.
